

Optical Switch End Stop Sensor

This optical switch/end-stop, which is accurate and easy to use. When the light is blocked, this switch will immediately output the digital control (Logic H), and the LED will be off. This optical switch only used 3-wires which is easy to interface to controller board.

SKU: SSR1048

Brief Data:

- Supply voltage: 5VDC.
- Output State (S): Active High (H).
- Detection Type: IR Optical.
- Output Indication: LED (red) Active Low.
- Board Dimension: 32x10mm.
- Cable Length: 50cm.
- Weight: ~1g.

Mechanical Dimension:

Unit: mm

Signal	Function
V	Power Supply +5Vdc.
S	Signal O/P: Low: No Object. High: Object Detected.
G	Supply ground 0V.

Schematic Diagram:

Application Example:

End Stop Detection in 3-D Printer.

The Face behind our product quality...

In a world of constant change and continuous technological development, a new or replacement product is never far away – and they all need to be tested.

Many vendors simply import and sell without checks and this cannot be the ultimate interests of anyone, particularly the customer. Every part sell on Handsotec is fully tested. So when buying from Handsontec products range, you can be confident you're getting outstanding quality and value.

We keep adding the new parts so that you can get rolling on your next project.
